SELECTED PROJECTS

TradeMaster - Inventory & Stock Management System | *Spring Boot | Angular | MySQL | JWT | Android*

Designed and developed a full-stack business management platform covering products, customers, suppliers, warehouses, stock movements, sales, purchases, returns, expenses, financial accounts, notifications, audit logs, and analytical reports. Implemented secured REST APIs, role-based authorization, POS workflows, low-stock alerts, invoice email delivery, multilingual UI, and an administrator-controlled payment approval process.

TradeMaster Mobile - Android Business Management App | *Java | XML | Volley | Spring Boot REST API*

Built a native Android client that consumes the TradeMaster backend through Volley. Implemented JWT login and session handling, dashboard statistics, product and customer management, warehouse stock views, stock movement tracking, low-stock alerts, sales, expenses, and payment request features.

CodeGen - Responsive IT Solutions Company Website | *HTML | CSS | Bootstrap | JavaScript*

Created a responsive corporate website with Home, About, Services, Team, Contact, Login, and Registration interfaces. Presented software development, cloud, cybersecurity, mobile application,

analytics, and IT consulting services in a modern multi-device layout.
